

## Sunset RV Rentals — Trailer Walkthrough

### Outside Storage Compartments

Carefully put things in and out

Do not leave loose items in compartments (put in duffels or containers)

Back compartment holds blocks, crank, and CLEAN WATER hose

Front Driver's side compartment holds the holding tank drain supplies

### Water Heater (on back, next to storage compartment)

The pilot light can be seen through small window

### Fresh Water Drain

Empty before returning the trailer

### Holding Tank Drains

Gloves are found under dinette bench in storage

Remove Cap

Connect sewer hose to trailer, other end in sewer cleanout

Pull handle to empty black tank first (sewer)

Pull handle to empty gray water tank (sinks/shower)

(The gray water will flush out the black tank)

Close gray water tank

Connect DIRTY water hose to clear elbow and spray out black tank

Turn water off, let drain completely

Close black tank

Disconnect water hose and sewer hose

CLEAN SEWER DRAIN EQUIPMENT WITH BLEACH & WATER

### City Water Connection (for use if you have access to water connections)

Attach CLEAN WATER HOSE

Turn on water

Water will not heat through the City Water Connection

Fill Tank for Hot Water Usage

### Gravity Fill Water Tank

Hold CLEAN WATER hose in opening.

Fill with water until water comes back out

### Power Cord

Use if you have power hook-up available.

### Propane Tanks

Open slowly to avoid freezing

Arrow shows which tank is being used. Will use one tank then switch to the other tank.

## Leveling stands

- One on each corner of the trailer
- Crank is in the back storage compartment
- Park trailer at destination, disconnect from pulling vehicle
- Doesn't need to be exact — eyeball the leveling.

## Steps

- Slightly lift and pull, then flip down the bottom step
- NEVER TRAVEL WITH STEPS DOWN

## Awning

- NEVER TRAVEL WITH STEPS DOWN
- NEVER USE WHEN WINDY. IF WIND PICKS UP, CLOSE
- Raining without wind: Gently pull one side down and lock
- Be sure to unlock before closing the awning.

## Switches just inside the door.

- One controls outside light
- One enables indoor lights to be used

## Fire Extinguisher

- Found just inside the door, near the floor

## CO2/Propane Detector

- Found on the backside of dinette bench seat

## Master Bedroom

- Storage compartment access under bed

## Sofa

- Turns into bed
- Lift bottom while holding top
- Rotate into a “V”
- Push down
- Always sleep on top of a blanket

## Dinette

- Storage underneath benches
- Cleaning supplies under one bench
- Turns into bed
- Remove all cushions
- Remove table top from poles
- Remove poles and lay them down between benches
- Lay table top down between benches
- Place Cushions down to form a bed
- Always sleep on top of a blanket

## Bunks

Storage compartment access under bottom bunk  
300 pound weight limit for each bunk

## Tank and Battery lights

Push buttons to see if status of battery and tanks

## Water Pump Switch

Use only if using fresh water tank  
Turn on only after tank is full  
May leave turned on at all times  
Turn off when water tank is empty

## Water Heater Switch

Use only when water is in the tank  
Turn on water pump; wait a few minutes  
Turn water heater switch on

## Kitchen Sink

Open packet and leave in bottom of sink to keep the gray water tank from smelling.

## Fridge

Turn onto auto  
Electricity will override gas  
If gas light flashes, check that gas is on

## Oven and Stove

Uses propane  
Lighter in upper cabinet  
Turn dial, hold in, light

Microwave, outlets, and AC only work with power connection.

## Microwave

Only works with power connection  
Rotating plate in bottom kitchen drawer

## Air Conditioning

Only works with power connection  
Air comes out vents in the ceiling

## Furnace

Uses propane  
Flip top switch to left to turn on  
Bottom lever controls temperature  
Flip top switch to right to turn off

## Stereo

Auxillary cable in cabinet to connect phone, mp3, ect  
Do not blast the volume — it will blow the speakers.

## Bathroom

Toilet paper underneath sink. Only use provided toilet paper.  
Do not flush feminine hygiene items — discard in trash  
Switch above toilet enables fan and light to work.  
Always use fan while showering.  
Turn switch on.  
Open Vent.  
Turn Fan on.  
Do not use other faucets while showering.  
**DO NOT TRAVEL WITH VENT OPEN**

## **\*\*GENERATORS (OPTIONAL)\*\***

**\*\*Must be at least 3 feet away from the trailer\*\***

**\*\*If you leave the trailer/campsite, turn the generators OFF\*\***

### To Turn ON the Generators:

Connect the two generators together with the included cables.

\*Red on Right

\*Black on Left

Connect the power cord

Open the air vents on the gas caps

Verify that the eco throttle is OFF

Choke ON

Engine switch ON

Pull cord to start

Choke OFF

Wait a few minutes before turning Eco throttle on

### To Turn OFF the Generators:

Turn Eco Throttle OFF

Engine Switch OFF

Let sit for a few minutes

Close the air vents on the gas caps
